

CHESNEYS

GAS STOVE COLLECTION

The Chesneys Gas Stove Collection combines the latest technology with a design aesthetic that places the product far ahead of the competition in terms of realism and functionality.

As close to a real fire as you can get

The beauty and warmth of a real log fire at the flick of a switch, Chesneys new gas stove provides an excellent heat output. Emulating the lazy flames and glow of a log burning stove, it offers a unique combination of efficiency and realism.

Engineering

A gas stove from Chesneys is an outstanding piece of engineering with every stove undergoing a rigorous build and performance process. Our research engineers have used the very latest technology to create an efficient product that is unique in both its functionality and appearance.

Ease of use

We believe that one of the main reasons for choosing a gas stove is convenience. Every Chesneys gas stove is controlled by a hand-held fully sequential remote control device that allows you to control the flame height and heat output from the comfort of your armchair.

Safety

With any gas appliance, safety is of paramount importance. Chesneys Gas Stove Collection has been tested and certified by the UK's leading independent test laboratory and our rigorous quality control systems ensure that all our appliances conform to British Standards.

Realism

Our aim is to make a gas stove that is indistinguishable in its appearance from a natural wood burning stove. Following extensive experimentation our engineers have succeeded in creating a fire that perfectly emulates the flame pattern of a real fire with individually hand painted logs that produce a deep lifelike glow.

The Beaumont

With its classical detailing and refined appearance, the Beaumont gas stove is an elegant addition to the decorative scheme of any room.

Its design includes uniquely classical features such as swept cabriole legs and a corniced top section.

The Beaumont is shown in black anthracite paint finish with the hand carved Clandon limestone surround from Chesneys Georgian Fireplace Collection.

Page 9

The Beaumont has an expansive glass window which allows a full appreciation of the entrancing flame pattern and glowing log bed that characterises every Chesneys gas stove.

The Beaumont is shown in a parchment paint finish that complements its refined appearance.

The Salisbury

The Salisbury is very much in the style of a traditional wood burning stove.

A robust and simple design with a solid cast iron door, housing a large glass window that allows the fire to be enjoyed.

The Salisbury in black anthracite paint finish with the Metro limestone surround and Modern Steel slips from Chesneys Contemporary Fireplace Collection.
