Exquisite fires for elegant homes

Wildfire are a multi award winning gas appliance manufacturer. The HE950L Seville Suite was named not only Gas fireplace suite of the year, but also 'Product of the Year' at the 2018 Hearth and Home exhibition.

Wildfire are dedicated to the design and manufacture of innovative and attractive fireplaces for British homes. At Wildfire we are committed to providing the highest quality heating products with a proven performance. Our innovative range of gas and electric fireplace suites have been tested to comply with the latest British and European standards and are manufactured in an ISO certified factory.

New for the 2021/2022 heating season is a beautiful range of gas fireplace suites featuring the Ravel 600/750/800. The Stunning new Ravel Stove is also now available, contact your dealer for a demonstration.

The Wildfire gas product range includes many products which have been designed and approved with efficiency at their core. In a world where energy costs have soared we believe it is important to obtain the absolute maximum from your heating appliance. With this in mind the net efficiency of Wildfire open fronted gas fires are up to 62% and the glass fronted fires up to 87.2%. So when you purchase a Wildfire heating product you can be confident that you will be installing a product that will deliver in all installation scenarios. Here at Wildfire we are devoted to innovative design whilst maintaining maximum functionality. All Wildfire slide control gas fires feature the latest patented Direct Slide technology.

Wildfire is the premier gas and electric appliance brand from Hearth Products Limited. Hearth Products has been actively involved in design and technology for the fireplace industry across the globe since 2003. Our product technologies have been used in products across Europe, Australia and North America.

Some things you need to know

Do I need a Convector or a Radiant Gas Fire?

It is important to know the difference between Radiant heat and Convected heat.

Radiant heat. In short, Radiant heat is emitted from all Wildfire appliances. This type of heat is actually infrared and heats objects in the room. Radiant heat is considered to be the most comfortable and natural form of heat.

Convected heat warms the air in the room. By passing the cooler air which enters the appliance at the bottom, through a heat exchanger, it warms up, then emits the hotter air back into the room from the top of the appliance.

Do I need a Glass Fronted Gas Fire?

A glass fronted fire will be more efficient and therefore more cost effective to run. Glass fronted appliances are usually more expensive to buy.

In general terms, it is usually more cost effective to purchase a glass fronted appliance if it is to be used more regularly as the efficiency savings will provide a quicker payback for the more expensive appliance. It is also important to remember that a glass fronted appliance will normally provide a similar amount of heat to an open fronted appliance, however, as it is more efficient, it is cheaper to run.

We guarantee our gas fire products for a period of 5 years from installation and our customer service staff are always on hand to help you with any query you may have with your product.*

Our 5 year limited guarantee is managed directly by Wildfire through our extensive network of service centres throughout the UK. Choose Wildfire for style, performance, reliability, value and peace of mind.*

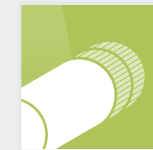

Brick Chimney

Pre-Fabricated

Pre-Cast

Balanced Flue

What type of flue do I have?

You will need to know what type of flue you have in your home. You will see these icons on each product page which will show if the appliance is suitable for your property. It may be that you have a Brick Chimney (otherwise known as a Class 1 flue), a Pre-Fabricated Metal System (which can be a Class 1 or Class 2 flue) or a Pre-Cast Flue (a flue which is built into the inner brickwork of your home). If you do not have a chimney or flue system in your home then you will need to look for a balanced flue gas fire which, if you already have a balanced flue gas fire in the property, is usually indicated by a flue terminal concealed within a basket on the outside of the property.

Manual Control

Slide Control

Manual Electronic Control

What control options are available?

All Wildfire products are available with a Direct Slide option giving you the ease of reliable and simple operation. The slide is operated from the top right side of the appliance and provides ignition, flame control and turns the fire off when you're finished. Most of the Wildfire range is available in manual control too – these fires have a removable cover at the base of the fire where the rotary control and igniter are situated.

Wildfire are also now introducing the manual electronic ignition to make the manual control range even easier to use.

Natural Gas

What type of gas do I need?

Wildfire appliances are currently only available for natural gas.

Function & Performance

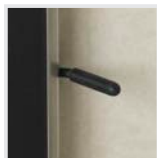

O.D.S

The Oxygen Depletion Sensor will automatically shut off the gas supply to the burner if the oxygen level in the room falls below a particular level. This is important as it will turn off the appliance should the flue become blocked or a lack of ventilation occurs.

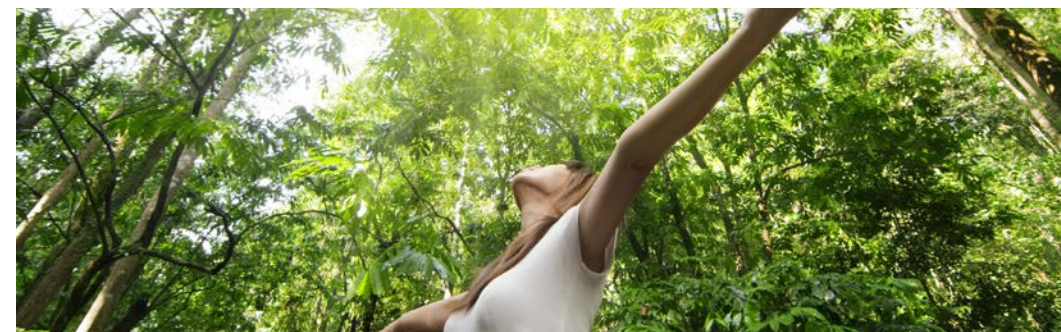

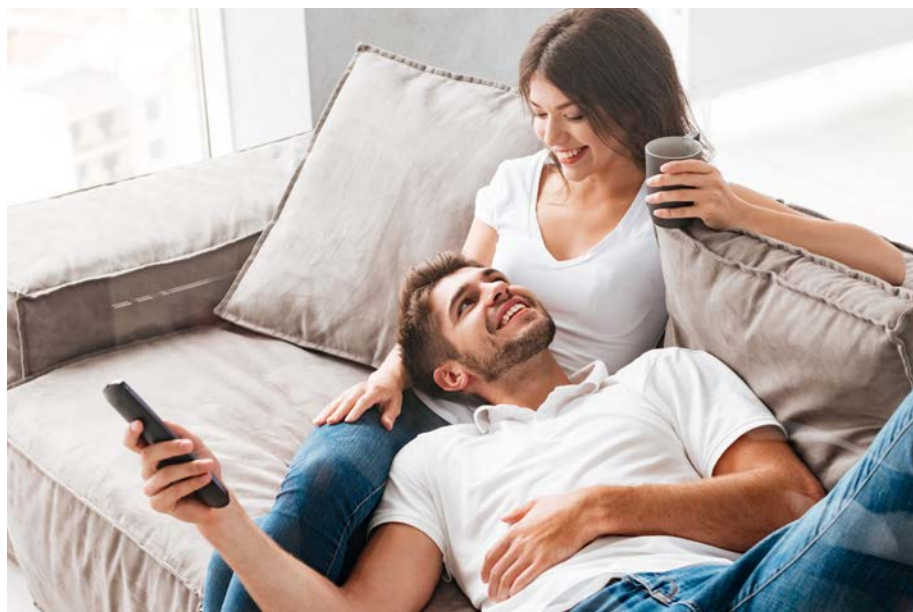

F.S.D

The Flame Supervision Device is designed to sense the presence of a flame. Should the flame be extinguished for any reason then the safety device will cut off the supply of gas to the burner.

Optional Ezi-Grip Handle

Most Wildfire appliances can be fitted with an elderly/infirm handle to ease the lighting operation. This larger handle is much easier to access and move so if you think that this may be a requirement then talk to your retailer who will demonstrate the Ezi-Grip system. This handle is purchased as an accessory and is fitted at the point of installation of the appliance.

The Wildfire range is proud to now include a range of glass fronted high efficiency gas fires. These products feature the latest technology in high output gas fires and deliver the most effective way of heating your living room. The range includes both mid-depth convector and full depth convector products, both available with Direct Slide Technology. The Cressida (full depth) appliance can also be installed into a hole in the wall by fitting the designer Ellipsis HIW trim (See pages 40 and 41). The balanced flue gas fire is also a high efficient appliance, for a no chimney solution, the Thermes delivers heat, value for money, efficiency and is available with a large range of trim options.

Open fronted appliances are designed to operate with the revolutionary XE system which is only available from Hearth Products. This new efficiency system is designed to 'tune' the appliance to your fireplace flue, thereby ensuring you obtain the maximum output from the appliance.

Regulations demand that gas fires must be installed by a Registered Gas Safe Engineer. For further information regarding Gas Safe requirements contact Wildfire directly, where we will be happy to give you advice. Warranty will be void if the appliance is not fitted in accordance to these legal requirements.

HE 900 (Avellino Suite)

HE

Shown as standard version. Also available for Precast Flue.

83% EFFICIENCY

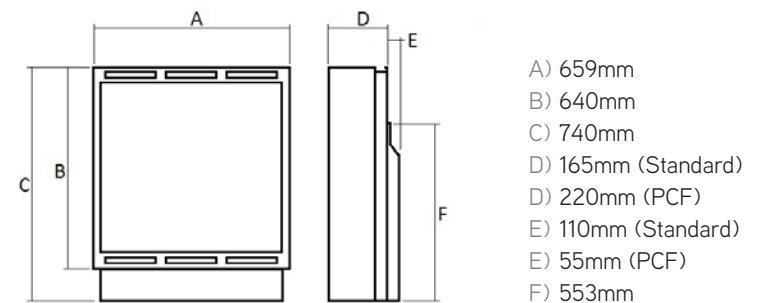

The HE900 is the flagship model from Wildfire, the ultimate in fireplace technology.

The HE900 gas fire is revolutionary. It has been developed to create a European format appliance with expansive viewing glass that can be installed into a conventional 16" x 22" fireplace opening without any modification, or precast flue where the PCF version is ordered. This patent pending product is designed to fit UK fireplace openings with no need to alter the fabric of the building.

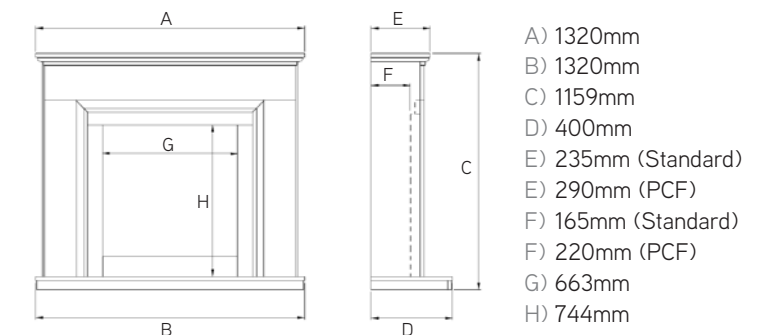

The HE900 features a stunning log and ember bed, easily controlled with a slide operating system which comes as standard. Finally, the ultimate fireplace solution has arrived...

The Avellino micro marble suite is available in manila, white or white with grey border.

HE 900 (Dawin Suite)

The HE900 (Pre-cast Flue) featured in the Dawin Suite (PCF) in Manila. Also available as Standard model. Inset Dawin Suite standard.

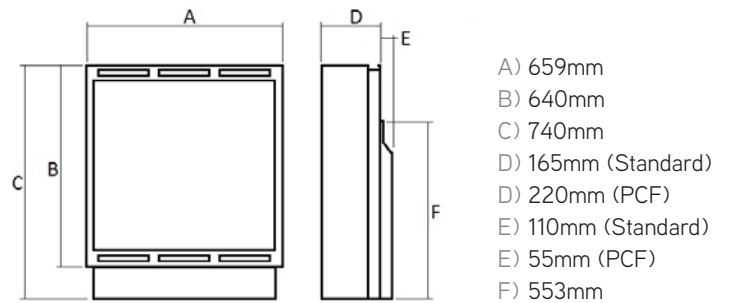

The HE900 is available with the Dawin Suite, shown here as a PCF version is a stylish solution for homes with precast flue systems.

No longer are you restricted to choosing a narrow slimline fire for your precast flue. After years of development, innovation and patent applications the precast gas fire market has changed.

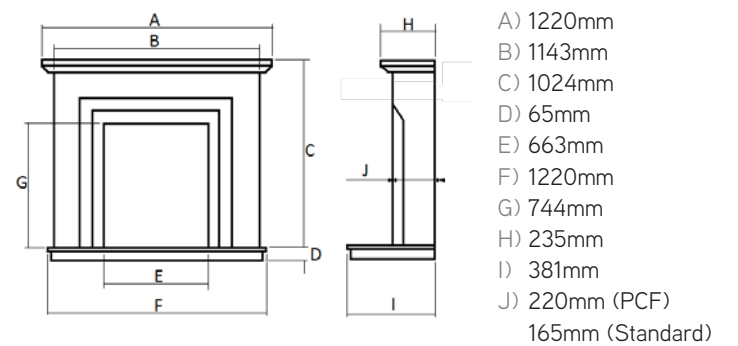

Ask your retailer to demonstrate this wonderful appliance, with its clean European styling, stunning log and flame ensemble with easy slide for ignition and control, nothing compares.

The Dawin suite completes this inspirational fireplace. The warmest and most welcome addition to your living room. Experience the future with the HE900PCF...

HE 950L (Seville Suite)

HE

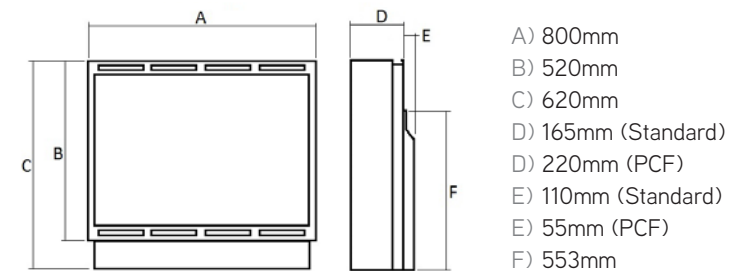

Shown as standard version. Also available for Precast Flue.

75%
EFFICIENCY

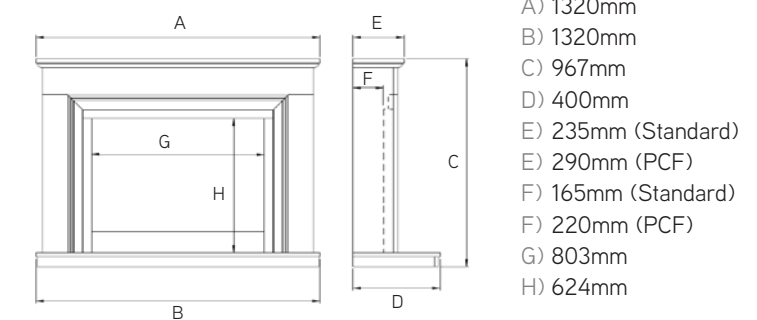

The new HE950L (STD & PCF) is the perfect appliance to bring your fireplace to life.

Just like the HE900, its predecessor, this fire fits into your standard 16" x 22" builders opening or precast flue if the PCF version is ordered. No building work, lintels, mess or costly installation. The fabric of your home will remain intact but you will benefit from a landscape, large format gas fire with beautifully crafted logs and colourful dancing flames. Ask your retailer for the different fireplace design options available with the HE950L, they will be able to deliver a suite to compliment the style of your living room.

HE 950L (Palma Suite)

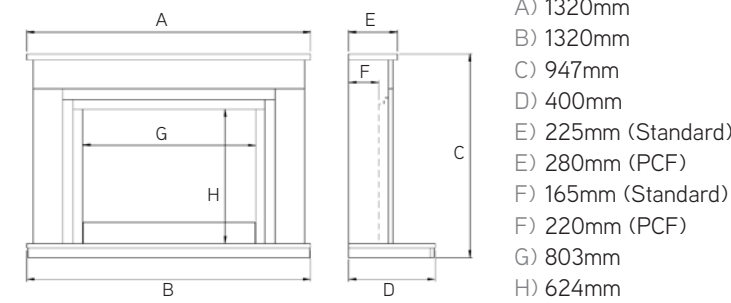

The new HE950L (STD & PCF) delivers the same benefits as the standard model but can be installed into any precast flue.

For too many years the gas fire options to customers who have precast flues have been extremely limited. Patent pending technology enables this product to work in these very small flues. This fire features a full width realistic log fuel bed with rolling flames guaranteed to captivate and mesmerise the most discerning home owner. Classic elegance...in a precast flue.

Panama HE (Salvador Suite)

HE

Panama HE shown with Contemporary Chrome/Black trim, installed into the Salvador suite in white.

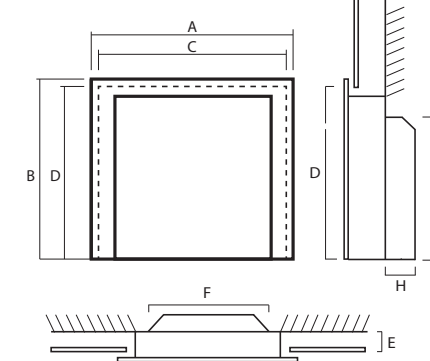

This fire requires a fireplace suite with a 3" rebate and a back panel opening of a specific size. Talk to your retailer for full details.

87%
EFFICIENCY

The Panama log fire is a revolutionary product.

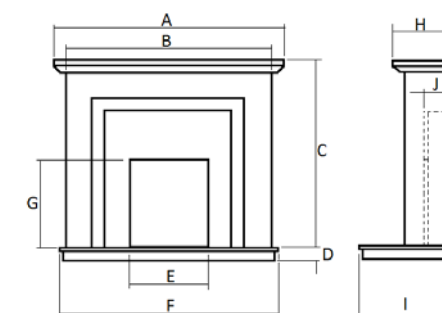

This wide format glass fronted gas appliance has the appeal of a European fire but the benefit of fitting into a standard 16" x 22" chimney breast opening. Normally an appliance of this stature would require building work and installation of a new lintel. The Panama has a patent pending installation system which, in conjunction with your new fireplace will provide a much more cost effective solution for this type of product. Talk to your dealer for full details. The Panama comes in slide control as standard.

Thermes

Balanced Flue

“The balanced flue fire that really delivers”

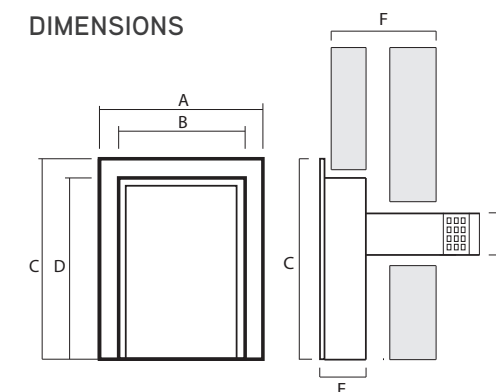

The Thermes is our high efficiency balanced flue gas appliance.

If you have no flue or chimney in your home you will need a balanced flue gas fire. The Thermes is a room sealed high efficiency gas fire that really delivers.

This fire flues through an external wall and can be installed in most new or existing fireplaces.

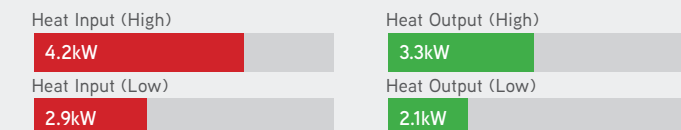

Remember, once you have chosen your appliance, you can decide how it looks by selecting trim and fret options. See the trim options below and in more detail on page 54.

BF960SL

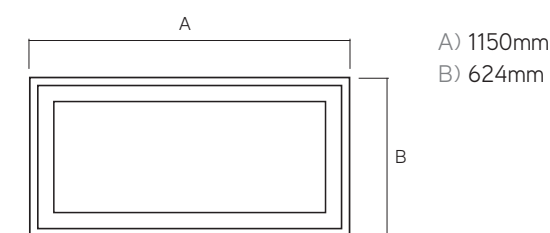

Balanced Flue

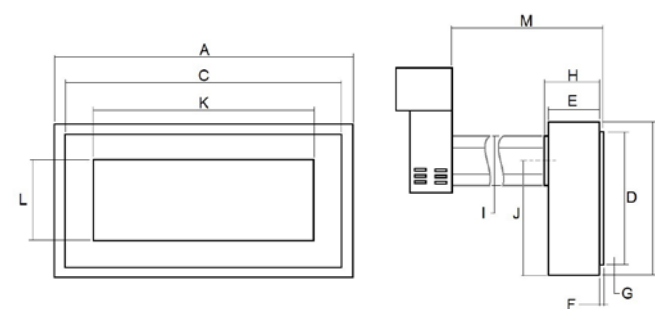

The BF960SL balanced flue gas fire is suitable for homes without a chimney.

This versatile and efficient slimline hole in the wall fire can be installed onto any outside wall of the home and generates a contemporary and stylish centrepiece for the room. This appliance can be installed directly into a cavity wall yet provides probably the deepest fuel bed effect for a product of its type. Coupled with a reflective black glass lining, this gas fire delivers the ultimate dancing flame effect and ceramic log layout.

PROFILE TRIM OPTIONS

Montese (Cadiz Suite)

The Montese shown with Cadiz suite in white/Grey. Also shown in all white (inset). Cadiz suite available with or without lights.

Available as XE model with canopy see page 7 for further information.

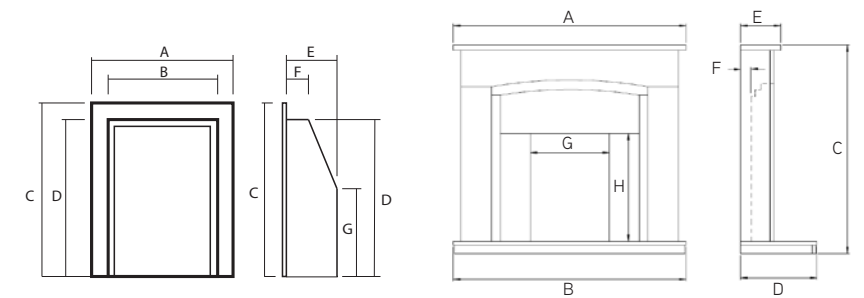

The Montese is a stunning fire that will enhance any living room.

The Montese is an authentic looking coal effect gas fire, where realism is the most important factor.

By utilising the broad range of trims that Wildfire provides, you can choose the mood of your room from contemporary to traditional. It is available with pebble and coal fuel bed options and offers an impressive radiant heat output.

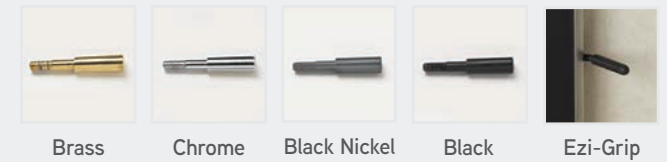

The Wildfire Montese is available in manual and slide control. See page 54 for full trim specifications.

Some things you need to know

Electric Fireplace Suites

All of our electric appliances provide up to 2kW of instantaneous heat. At the push of a button, or from a programmed timer, this clean convected heat will power warmth into your room whenever you need it.

A mesmerising flame effect completes these beautiful products. With stunning log arrangements and a choice of three levels of flame control and up to five brightness/intensity levels. The vibrant flame effects provide that feeling of comfort even when the heat is not switched on. The flame effect system is a safe convenient and efficient design which uses only LED technology to ensure that running costs in flame only mode are extremely low.

The Wildfire range of suites couple this electric fire technology with exquisite micro marble fireplaces. Available in a range of colours (see pages 70 & 71) these suites all allow a flat to wall installation*

*The Panama E22 and Ravel E16 installed in the Salvador suite require a spacer frame (supplied separately) to allow flat to wall installation. If no spacer is required for this suite then a 65mm recess for the width and height of the appliance is required.

We guarantee our electric fire products for a period of 1 year from installation and our customer service staff are always on hand to help you with any query you may have with your product.*

Our 1 year guarantee is managed directly by Wildfire through our extensive network of service centres throughout the UK. Choose Wildfire for style, performance, reliability, value and peace of mind.*

The distinguishing feature of a flame effect electric fire is the ability to provide a 'feel warm' comfort level with its' mesmerising glow at any time of the year. An energy efficient way to produce a stunning effect with minimal running costs. The instantaneous heat can be called upon on those colder evenings when its just not practical or cost efficient to turn on the central heating.

What control options are available?

The multifunction remote control handset provides ultimate controllability for your electric appliance. From 'Normal' operating mode where the appliance will run continually until the required temperature is set, to daily or weekly timer settings to give you complete control over the heating function.

A countdown timer is also included so the unit can be automatically be powered down after a predetermined length of time.

This beautifully styled remote features an internal thermostat to ensure it senses the right temperature in the room. An LCD display features all of the control functions available including flame setting and flame intensity.

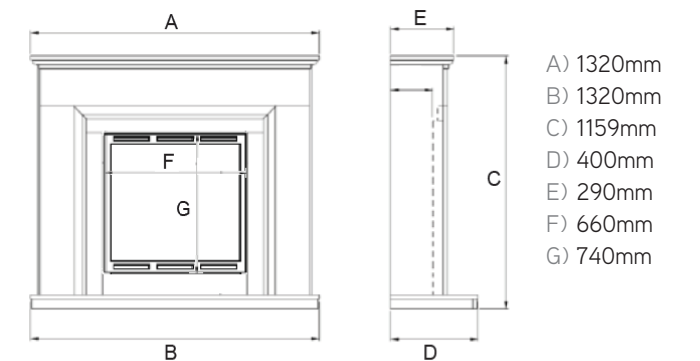

HE 900E (Avellino Suite)

The HE900E Avellino is a 52” flat to wall marble electric fireplace suite.

This fully electronic remote control fireplace offers 7 day thermostatic operation. The suite is available in all white or white with a distinctive grey highlight. A variety of flame effects provide a great solution to suit the mood for the day.
